MEMORANDUM

SUBJECT: Review of PRP DRAFT SAP for Richardson Flats RI/FS

FROM: Jim Christiansen, RPM

TO: Susan Griffin, EPR-PS
Mary Goldade, EPR-PS

Attached is a draft SAP for the Richardson Flats proposed NPL site in Park City, Utah. I have not reviewed it yet. Please review the document and provide comments either by email or hard copy. I am trying to provide as quick a response as possible to accommodate some sampling before the snow gets too deep in Park City, but the PRP was a bit late in getting the SAP to me, so do what you can. We have one month to provide a response, but I would obviously like to do so much quicker than that.

This SAP does not yet contain provisions for split sampling activities by our contractor. They just received this SAP also and are currently working on an addendum and any recommendations for changes to this SAP to provide for quality oversight. They will not be preparing an entirely separate SAP for oversight, only an addendum. This is a very cooperative PRP and we are trying to minimize oversight costs as appropriate.

This SAP also will not provide for all of the needed data collection for the RI. It is a first step. Some data needs, especially related to ecorisk, aren't clear yet, but we wanted to get some data collection going this winter. However, if there are needs that aren't addressed, I want this SAP to cover as much as possible. If you have any questions, please give me a call. x6748.
